

[139 words]:

Today's speaker is here to keep you safe.

He first worked for the FBI—eventually going undercover to take down Robert Hanssen, his new boss, who was giving top secret information to the Russians.

It's a thrilling story that went straight to Hollywood.

Perhaps you saw *Breach*, starring Ryan Phillippe and Laura Linney. Or read our speaker's bestselling book, *Gray Day: My Undercover Mission to Expose America's First Cyber Spy*.

Our speaker did this while in law school.

He then started a consultancy specializing in competitive intelligence, cybersecurity, and risk assessment.

He has served as National Security Strategist—with VM Ware, Carbon Black, and the hot startup, NeXasure.

His new book, **Spies, Lies, and Cybercrime: Cybersecurity Tactics to Outsmart Hackers and Disarm Scammers** shines a light on the new cyber threat that challenges all of us.

Please give a warm welcome to cybersecurity expert. Legendary FBI spy hunter. Attorney. And bestselling author...

**ERIC O'NEILL.** *[Applause.]*
